Care & Cosmetics

Product catalogue 2023

Effective protection for what really matters

DrDeppe - hygiene and care solutions for over 40 years

We are effective where hygiene matters

Hands are the most common carriers of pathogens. Consistent hand hygiene is one of the most important measures for professional infection prevention.

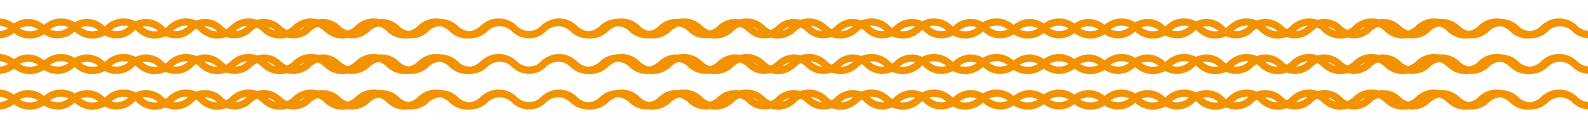

Hand disinfection

DrDeppe products for hand disinfection are the result of over 40 years of experience and the continuous development of our expertise. Our hand disinfectants are active against enveloped viruses and therefore effective against the SARS-CoV-2 coronavirus, including the SARS-CoV-2 variant Omicron.

Care & cosmetics

Our skin is stressed every day and needs cleansing and care at this time. Our Professional & Care portfolio includes liquid soaps, as well as caring creams for hands, body and face, but also sun protection products.

Product description

OpSept virugon® is a ready-to-use, alcoholic, lipid-regulating and fragrance-free disinfectant for hygienic and surgical hand disinfection. Due to its low alcohol content, it is very well tolerated by the skin when used frequently.

OpSept virugon® is virucidal effective in 30 seconds.

Area of application

Applicable in all areas with increased risk. OpSept virugon® has a very broad spectrum of activity, especially against enveloped and non-enveloped viruses. Infection prevention for effective hand disinfection takes place after only 30 seconds.

Instructions for use

Clean heavily soiled hands with soap and water before disinfection. Dry wet hands before disinfection. For hygienic hand disinfection, add 3 ml to the palm of the hand and rub thoroughly with both hands for 30 seconds so that the hands are completely wetted. Make sure the spaces between the fingers, skin creases and corners of the fingernails are also completely wetted. Keep your hands moist for the entire exposure time of 30 seconds and re-dose if necessary. For surgical hand disinfection, rub a sufficient amount into the hands so that the entire palm including the

problem areas interdigital area and nail fold is wetted for 2 minutes. Keep the hands moist during the entire exposure time of 2 minutes and re-dose if necessary. After the exposure time of 30 seconds or 2 minutes, the disinfection is complete. For professional use only.

OP Sept Classic

Product description

OP Sept Classic is a ready-to-use, alcohol-based disinfectant for hygienic and surgical hand disinfection.

Area of application

Suitable for all areas of human hygiene.

Instructions for use

If the hands or surfaces are heavily soiled, wash them before disinfecting. Dry the wet hands before disinfecting. For hygienic hand disinfection, add 3 ml to the palm of the hand and rub thoroughly with both hands for 30 seconds so that the hands are completely wetted. Make sure the spaces between the fingers, skin creases and corners of the fingernails are also completely wetted. Keep your hands moist for the entire exposure time of 30 seconds and re-dose if necessary. For surgical hand disinfection, rub 3 ml into the hands so that the entire palm of the hand, including the problematic interdigital and nail bed areas, is wetted for 90 seconds.

Keep your hands moist for the entire exposure time of 90 seconds and re-dose if necessary.

After the exposure time of 30 or 90 seconds has elapsed, the disinfection is complete.

Soap products

Lotio Med Professional & Care

Lotio Med Professional & Care series is a liquid, alcohol-free soap, based on mild deterative surfactants. This gently cleanses the skin and ensures a pleasant, clean feeling. The soap is suitable for daily, gentle cleansing of the skin. Lotio Med Professional & Care is kind to skin and dermatologically tested.

Ingredients:

AQUA, SODIUM LAURETH SULFATE, COCAMIDOPROPYL BETAINE, COCO-GLUCOSIDE, GLYCERYL OLEATE, HYDROGENATED VEGETABLE GLYCERIDES CITRATE, TOCOPHEROL, CITRIC ACID, SODIUM CHLORIDE, SODIUM BENZOATE, POTASSIUM SORBATE, PARFUM, CI 19140, CI 42090

Lotio Med Soft Professional & Care

Lotio Med Soft Professional & Care is the advanced formula of Lotio Med Professional & Care that does not use colourings and perfume oils. The skin is gently cleansed. This alcohol-free, liquid soap is suitable for daily, mild skin cleansing. Lotio Med Soft Professional & Care is kind to skin and dermatologically tested.

Ingredients:

AQUA, SODIUM LAURETH SULFATE, COCAMIDOPROPYL BETAINE, COCO-GLUCOSIDE, GLYCERYL OLEATE, GLYCOL DISTEARATE, GLYCERIN, HYDROGENATED VEGETABLE GLYCERIDES CITRATE, TOCOPHEROL, CITRIC ACID, SODIUM CHLORIDE, SODIUM BENZOATE, POTASSIUM SORBATE

Lotio Med Sensitive Professional & Care

Lotio Med Sensitive Professional & Care is a liquid, alcohol-free soap that gently cleanses the skin thanks to its mild deterative surfactants. In addition, perfume, colourings and sulphates were not used during development. The liquid soap combines care and cleansing of the skin and leaves skin feeling supple. Lotio Med Sensitive Professional & Care is suitable for daily, gentle cleansing of the skin, is kind to skin and dermatologically tested.

Ingredients:

AQUA, LAURYL GLUCOSIDE, COCAMIDOPROPYL BETAINE, SODIUM LAURYL GLUCOSE CARBOXYLATE, SODIUM COCOYL GLUTAMATE, COCO-GLUCOSIDE, GLYCERYL OLEATE, GLYCOL DISTEARATE, GLYCERIN, HYDROGENATED VEGETABLE GLYCERIDES CITRATE, SODIUM CITRATE, PROPYLENE GLYCOL, SORBIC ACID, TOCOPHEROL, CITRIC ACID, SODIUM BENZOATE, POTASSIUM SORBATE

Application: Apply 2 ml of the liquid soap directly to damp skin and then rinse thoroughly with clean water. The washing lotion can be used several times a day as a body care product. Avoid contact with the eyes.

Care products

Lotio Protect Professional & Care

Lotio Protect Professional & Care is an alcohol-free skin protection cream that is ideally suited for the care sector. The water-in-oil emulsion provides protection for the skin by forming a breathable skin barrier and thus protecting it from external influences. Once the cream is sufficiently applied to the skin, it is quickly absorbed and does not leave a greasy film. Lotio Protect Professional & Care contains vitamin E, panthenol and calendula extract, it is skin-friendly and dermatologically tested.

Ingredients:

AQUA, CAPRYLIC/CAPRIC TRIGLYCERIDE, CETEARYL ISONONANOATE, GLYCERIN, BUTYLENE GLYCOL, PANTHENOL, POLYGLYCERYL-3 POLYRICINOLEATE, MAGNESIUM SULFATE, POLYGLYCERYL-3 DIISOSTEARATE, CERA ALBA, PAPAVER SOMNIFERUM SEED OIL, PRUNUS AMYGDALUS DULCIS OIL, ZINC OXIDE, TOCOPHERYL ACETATE, CALENDULA OFFICINALIS FLOWER EXTRACT, LACTIC ACID, ETHYLHEXYLGLYCERIN, PHENOXYETHANOL, POTASSIUM SORBATE, SODIUM BENZOATE, PARFUM

Lotio Lind Professional & Care

Lotio Lind Professional & Care is an alcohol-free, lightweight skincare lotion that absorbs quickly into skin, is non-greasy and leaves skin feeling light. The new formulation contains high-quality oils, but also active ingredients such as vitamin E, panthenol and marigold extract. This makes Lotio Lind Professional & Care perfect for daily use as well as after hand disinfection. Lotio Lind Professional & Care is kind to the skin and dermatologically tested.

Ingredients:

AQUA, CAPRYLIC/CAPRIC TRIGLYCERIDE, GLYCERIN, CETEARYL ISONONANOATE, CETEARYL ALCOHOL, GLYCERYL STEARATE SE, PRUNUS AMYGDALUS DULCIS OIL, PANTHENOL, TOCOPHERYL ACETATE, CARBOMER, SODIUM STEAROYL GLUTAMATE, XANTHAN GUM, BISABOLOL, CALENDULA OFFICINALIS FLOWER EXTRACT, LACTIC ACID, SODIUM HYDROXIDE, ETHYLHEXYLGLYCERIN, PHENOXYETHANOL, POTASSIUM SORBATE, SODIUM BENZOATE, PARFUM

Lotio Body High Professional & Care

Lotio Body High Professional & Care body cream is intended for intensive care of dry and stressed skin. The high-quality oils and vitamin E, as well as panthenol, ensure a pleasant feeling on the skin. Lotio Body High Professional & Care is kind to skin, alcohol-free and dermatologically tested.

Ingredients:

AQUA, CETEARYL ISONONANOATE, GLYCERIN, CETEARYL ALCOHOL, CAPRYLIC/CAPRIC TRIGLYCERIDE, GLYCERYL STEARATE SE, PAPAVER SOMNIFERUM SEED OIL, CARBOMER, PANTHENOL, SODIUM STEAROYL GLUTAMATE, TOCOPHERYL ACETATE, XANTHAN GUM, BISABOLOL, CALENDULA OFFICINALIS FLOWER EXTRACT, LACTIC ACID, SODIUM HYDROXIDE, ETHYLHEXYLGLYCERIN, PHENOXYETHANOL, POTASSIUM SORBATE, SODIUM BENZOATE, PARFUM

Application: Lotio Protect Professional & Care, Lotio Lind Professional & Care and Lotio Body High Professional & Care can be used as a hand cream several times a day and remains on the skin.

Lotio Foam Professional & Care

Lotio Foam Professional & Care is based on the soaking lotion of Lotio Soft Body Wipes Professional & Care, which is why the foam is also suitable for gentle care and cleaning. The mild surfactants ensure gentle cleansing and a pleasant feeling on the skin. Thanks to the high-quality ingredients, the skin is moisturised during care and cleansing. Lotio Foam Professional & Care is kind to skin, alcohol-free and dermatologically tested.

Ingredients:

AQUA, PENTYLENE GLYCOL, COCA-MIDOPROPYL BETAINE, COCO-GLUCOSIDE, PANTHENOL, HAMAMELIS VIRGINIANA LEAF WATER, ALLANTOIN, CITRIC ACID, SODIUM BENZOATE, POTASSIUM SORBATE, PARFUM

Application: Shake the bottle well before use and spray the foam onto the parts of the skin to be cleaned. Leave for a short time and then wipe off. When using on the face avoid contact with the eyes.

Lotio Sun LSF 50 | Ingredients:

AQUA, C12-15 ALKYL BENZOATE, DIETHYLAMINO HYDROXYBENZOYL HEXYL BENZOATE, CAPRYLIC/CAPRIC TRIGLYCERIDE, GLYCERIN, ISOPROPYL MYRISTATE, ETHYLHEXYL TRIAZONE, BIS-ETHYLHEXYLOXYPHENOL METHOXYPHENYL TRIAZINE, CETEARYL ALCOHOL, PHENYLBENZIMIDAZOLE SULFONIC ACID, GLYCERYL STEARATE SE, SIMMONDSIA CHINENSIS SEED OIL, TROMETHAMINE, POLYESTER-7, SODIUM STEAROYL GLUTAMATE, NEOPENTYL GLYCOL DIHEPTANOATE, BUTYROSPERMUM PARKII BUTTER, HYDROGENATED COCO-GLYCERIDES, PANTHENOL, TOCOPHERYL ACETATE, XANTHAN GUM, HIPPOPHAE RHAMNOIDES FRUIT EXTRACT, DISODIUM EDTA, CARBOMER, PUNICA GRANATUM FRUIT EXTRACT, GLYCYRRHIZA GLABRA ROOT EXTRACT, RETINYL PALMITATE, HELIANTHUS ANNUUS SEED OIL, LYCIUM BARBARUM FRUIT EXTRACT, TOCOPHEROL, SORBIC ACID, LACTIC ACID, SODIUM HYDROXIDE, ETHYLHEXYLGLYCERIN, PHENOXYETHANOL, POTASSIUM SORBATE, SODIUM BENZOATE, PARFUM

Application: Apply Lotio Sun before sun exposure. Reapply as necessary to maintain protection.

Lotio After Sun

Matching the Lotio Sun series, there is an After Sun that can be applied to stressed skin after every sun exposure. High levels of aloe vera (10%), other plant extracts and high-quality oils help deliver a high level of hydration while caring for skin. Lotio After Sun absorbs quickly into the skin, does not leave a sticky film and ensures a pleasant feeling on the skin. The fruity, gentle scent of sea buckthorn is particularly striking. Lotio After Sun is kind to the skin, alcohol-free and dermatologically tested.

Ingredients:

AQUA, ALOE BARBADENSIS LEAF EXTRACT, GLYCERIN, PRUNUS AMYGDALUS DULCIS OIL, BUTYROSPERMUM PARKII BUTTER, CARBOMER, SIMMONDSIA CHINENSIS SEED OIL, HYDROGENATED COCO-GLYCERIDES, PANTHENOL, TOCOPHERYL ACETATE, GLYCYRRHIZA GLABRA ROOT EXTRACT, HIPPOPHAE RHAMNOIDES FRUIT EXTRACT, SODIUM STEAROYL GLUTAMATE, XANTHAN GUM, PUNICA GRANATUM FRUIT EXTRACT, ALLANTOIN, GLYCERYL CAPRYLATE, CALENDULA OFFICINALIS FLOWER EXTRACT, RETINYL PALMITATE, HELIANTHUS ANNUUS SEED OIL, LYCIUM BARBARUM FRUIT EXTRACT, TOCOPHEROL, LACTIC ACID, CITRIC ACID, SORBIC ACID, SODIUM HYDROXIDE, ETHYLHEXYLGLYCERIN, PHENOXYETHANOL, POTASSIUM SORBATE, SODIUM BENZOATE, PARFUM

Lotio After Sun Cooling Gel

The Lotio After Sun Cooling Gel is available as an add-on to the Lotio After Sun. The gel absorbs quickly into the skin, does not leave a film and is non-sticky. Plus, aloe vera and other plant extracts help hydrate skin. The fruity, gentle scent of sea buckthorn is particularly striking. Lotio After Sun is kind to skin, alcohol-free and dermatologically tested.

Ingredients:

AQUA, SACCHAROMYCES FERMENT FILTRATE, PENTYLENE GLYCOL, GLYCERIN, ALOE BARBADENSIS LEAF EXTRACT, PUNICA GRANATUM SEED OIL POLYGLYCERYL-4 ESTERS, PUNICA GRANATUM FRUIT EXTRACT, HIPPOPHAE RHAMNOIDES FRUIT EXTRACT, CALENDULA OFFICINALIS FLOWER EXTRACT, ALBATRELLUS CONFLUENS EXTRACT, SODIUM PHYTATE, CARBOMER, LACTIC ACID, CITRIC ACID, DEHYDROACETIC ACID, ETHYLHEXYLGLYCERIN, PHENOXYETHANOL, POTASSIUM SORBATE, SODIUM BENZOATE, BENZYLALCOHOL, PARFUM

Application: Apply Lotio After Sun and Lotio After Sun Cooling Gel after sun exposure. Reapply as necessary to maintain effect.

Lotio Aktiv Professional

Product description

Lotio Aktiv Professional is a care gel that is used before and after physical activities. Its formulation is based on a high-quality formula of arnica extract, menthol, rosemary and peppermint oil.

What is the effect of Lotio Aktiv Professional?

The gel cools sustainably and gives a pleasant feeling of freshness and revitalisation to the skin.

Some facts about body care and cosmetics – www.haut.de

Rosemary is used for its relaxing and also vitalising effect. Its fragrance is very stimulating.

Menthol is not only a flavouring agent, but also has cooling, refreshing and circulation-enhancing properties.

In skin care, **eucalyptus** promotes blood circulation and regenerates the skin. Eucalyptus oil has a particularly anti-inflammatory effect and can also strongly promote blood circulation. It helps against muscle pain, which can be reduced by increased blood circulation. It also has a relaxing effect.

Arnica is found in skin care cosmetics in skin care creams. In 2001, arnica was named medicinal plant of the year. Arnica flower extract increases the blood flow in the peripheral blood vessels, which improves the supply of the skin and increases the skin metabolism.

Ingredients:

ALCOHOL DENAT., AQUA, ROSMARINUS OFFICINALIS LEAF OIL, MENTHOL, CAMPHOR, MENTHA ARVENSIS LEAF OIL, ARNICA MONTANA FLOWER EXTRACT, PROPYLENE GLYCOL, ACRYLATES/ C10-30 ALKYL ACRYLATE CROSSPOLYMER, GLUCOSE, TRIETHANOLAMINE, LACTID ACID, POTASSIUM SORBATE, SODIUM BENZOATE, LIMONENE

Product range and specification

Item number	Container size	Container type	Packaging unit
700121	200 ml	tube	12x 200 ml

Application: Apply Lotio Aktiv Professional Gel to the hand or directly to the affected skin area and massage in gently. Lotio Aktiv Professional Gel provides lasting cooling and a pleasant feeling of freshness and revitalisation. Liquid and vapour easily flammable. Use product only on intact skin. Do not bring into contact with eyes or mucous membranes.

Standard rub-in method for hygienic hand disinfection according to EN 1500

Step by step guide

Give sufficient disinfectant to your palms. Rub both palms together. Also make sure that your wrists are rubbed with disinfectant.

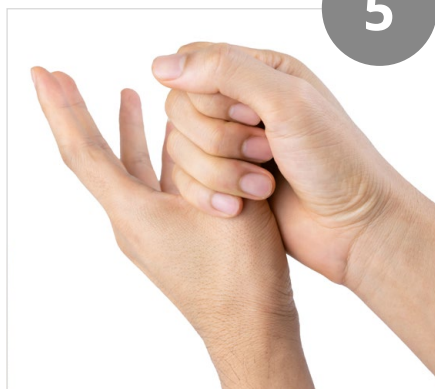

Right palm over left back of the hand and vice versa. Make rotary movements.

Put palm onto palm with spread fingers. Cross fingers and open them again.

Outside of the fingers into opposite palm. Cross fingers. Ease the grip and cross fingers again.

Rotary rubbing of the left thumb in the closed right palm and vice versa.

Rotary rubbing of the closed fingertips of the right hand in the left palm and vice versa.

Apply the hand disinfectant into the hollow, dry hands and rub them up to the wrists over 30 seconds following the steps listed. Perform the movements of each step five times. Observe the recommended contact time of the respective product and that the hands remain moist for the entire hands remain moist. If necessary use hand disinfectant again.

Our recommendation for your infection protection

Hands are the most frequent carriers of pathogens.

Consistent hand hygiene and the wearing of gloves are the most important measures for a professional infection prevention.

To whom infection protection is obligatory?

Here it is worth taking a look at §23 of the infection protection law (IfSG). There it is regulated which facilities have to follow the guidelines described there.

Hand washing

Lotio Med Sensitive Professional & Care

Lotio Med Sensitive Professional & Care is a liquid, alcohol-free soap that gently cleanses the skin thanks to its mild detergents. In addition, perfume, colourings and sulphates were not used during development. The liquid soap combines care and cleansing of the skin and leaves skin feeling supple. Lotio Med Sensitive Professional & Care is suitable for daily, gentle cleansing of the skin, is kind to skin and dermatologically tested.

Disinfection

OpSept VIRUGON®

OpSept virugon® is a ready-to-use, alcoholic, lipid-regulating, and dermatologically tested perfume-free disinfectant for hygienic and surgical hand disinfection. Due to its low alcohol content, it is very well tolerated by the skin when used frequently.

Care

Lotio Protect Professional & Care

Lotio Protect Professional & Care is an alcohol-free skin protection cream that is ideally suited for the care sector. The water-in-oil emulsion provides protection for the skin by forming a breathable skin barrier and thus protecting it from external influences. Once the cream is sufficiently applied to the skin, it is quickly absorbed and does not leave a greasy film. Lotio Protect Professional & Care contains vitamin E, panthenol and calendula extract, it is skin-friendly and dermatologically tested.

Hand disinfection

Care & cosmetics

Disinfectant is listed at **Verbund für Angewandte Hygiene e.V.** (www.vah-online.de)

Disinfectant is listed at **Industrieverband Hygiene und Oberflächenschutz für industrielle und institutionelle Anwendung e. V.** (www.desinfektionsmittelliste.de)

Products, after examination by the independent dermatological institute **Dermatest GmbH**, are skin-compatible and safe.

Hygienic hand disinfection (EN 1500)

Skin disinfection that causes the reduction of the number of microorganisms on the hands.*

Surgical hand disinfection (EN 12791)

Routine medical measure to significantly reduce the transient and resident bacterial colonisation of the skin (skin flora) prior to surgical procedures or invasive diagnostic procedures.*

Hygienic hand washing (EN 1499)

Simple, effective hygiene measure which, if carried out correctly, leads to a significant reduction in germs on the skin of the hands.*

Laboratorium Dr. Deppe GmbH – General Terms and Conditions of Sale and Delivery

I. General

The following General Terms and Conditions of Sale and Delivery become the contents of contracts which we (the seller) conclude with entrepreneurs within the meaning of Section 14 of the German Civil Code [Bürgerliches Gesetzbuch, BGB] (customers). These General Terms and Conditions also apply to all future business relations with the customer even if they have not been expressly agreed a second time. We expressly rebut any General Terms and Conditions of our customers.

II. Effective date of a contract, adjustment of the scope of delivery, and cancellation

1. A contract becomes effective once the customer has received our confirmation of order in text form. Our offers are to be understood as a request to the customer to submit its own offer, which we accept with the confirmation of order.
2. In the case of doubt, the contents of the contract are based on the confirmation of order.
3. Confirmed prices are in principle binding, unless we reserve the right in the confirmation of order to adjust the prices.
4. We reserve the right to exceed or fall short of the quantity of the lot to be delivered to you by 10%. You will pay for the quantity that is actually delivered. We may exercise this right if we ourselves are supplied with excess quantities or short shipments by the sub-supplier despite a purchase order adjusted for your order.
5. We offer cancellation of a contract in exceptional cases and only against a cancellation fee, which we base on the costs incurred by us up to the processing of the customer's cancellation request. The customer has no legal claim to an offer of cancellation. We will only notify the customer of the cancellation offer in writing. The cancellation shall only become effective upon receipt of the cancellation fee within the payment period specified to the customer in the notification, provided that, in said notification, we do not offer the option of written acceptance of the offer and a payment period beyond this.

III. Delivery

1. Delivery dates or delivery periods are binding only

if we confirm them in writing. Any delivery times stated are approximate.

2. Subject to any other individual agreement, we shall deliver the properly packed goods (obligation to perform at the place of despatch). We always deliver EXW, Incoterms 2010, unless we confirm a different procedure.
3. The timing of despatch ex works is decisive for compliance with delivery periods and dates. If the goods cannot be despatched in a timely manner through no fault on our part, we are deemed to have satisfied our obligations by notifying the customer that the goods are ready for despatch.
4. Delivery periods commence from the date of our confirmation of order. Delivery periods and delivery dates are postponed or extended until our customer has performed its own required contribution for the execution of the order (e.g. obtaining all official certificates, providing guarantees and letters of credit, making advance payments, printing and product approval certificates, delivery of primary or intermediate products/packing).
5. In the case of delay, the customer may withdraw from the contract upon expiry of a reasonable period of at least two weeks - set by us - if the goods have not been despatched by expiry of the period. Further claims, especially claims for damages, are precluded.
6. Delivery obligations may be deferred or suspended completely in the following cases; we shall definitely inform the customer immediately of any delay and, if the delivery obligation is suspended or ceases, payments received shall be refunded immediately.
 - a. Our delivery obligation is subject to correct and timely delivery on the part of our suppliers, unless we are at fault for the wrong or delayed delivery. Part-deliveries are permissible insofar as the customer can reasonably be expected to accept them.
 - b. In events of force majeure, we may postpone delivery by the duration of the hindrance and a reasonable start-up time. This also applies if such events occur during an existing delay. Force majeure is deemed to include monetary, trade and other governmental measures (in particular pandemic-related measures), strikes, lock-outs, operational disturbances for which we

are not responsible (e.g. fire, shortage of raw materials or energy), transportation obstructions, delays at customs, and all other circumstances for which we are not responsible that make delivery considerably more difficult or impossible. It is irrelevant whether these circumstances occur on our premises or those of a sub-supplier. If the aforementioned events, especially a delay of more than three months in performing the contract in substantial parts, mean either party to the agreement cannot reasonably be expected to perform the contract, this party may completely or partly withdraw from the contract. This may not form the basis of any claims for damages. The seller may rely on the above mentioned circumstances only if it notifies the customer immediately thereof.

IV. Packing

We pack the goods for despatch on pallets. The packing is not intended or suitable for delivery to the end customer or for storage of the goods.

V. Prices and payment

1. All prices exclude the applicable statutory rate of VAT.
2. In the case of master agreements or supply quotas, we reserve the right to set minimum order quantities. Failure to order the minimum quantity agreed in a single order on call and/or in a single order leads to a minimum order surcharge of 10% being added to the agreed product price.
3. Regardless of minimum order quantities, we charge a handling fee of € 50.00 per shipment on orders worth less than € 500.00 net (sales price of the goods excluding insurance, packing, transport and VAT).
4. If goods not destined for the territory of the Federal Republic of Germany are collected by the customer or its representative, the customer shall provide us with the export certificate (entry certificate) required for tax purposes. Otherwise the customer shall pay us an amount corresponding to the respective applicable rate of VAT for domestic supplies in addition to the invoice amount.
5. Unless individually agreed otherwise, we supply only upon full payment of the relevant invoice and all other invoices owed by the customer (customer's advance payment obligation).
6. In the case of goods supplied abroad (including to EU states), we may - regardless of the advance payment obligation - make the supply contingent upon the customer's provision of security for payment (bank guarantee).
7. The customer may set off only those claims which are uncontested and have been finally settled.
8. Claims are due upon receipt of the invoice, no later than 14 days after delivery of the goods, unless otherwise agreed in an individual contract. It is sufficient if the customer has received the invoice by fax or by email.

VI. Warranty and notice of defects

1. On the goods we sell, we provide a warranty of one year after arrival of the goods at the customer's premises or, in the case of sales shipment, at the place of destination. The regulations on the sale of consumer goods remain unaffected by this.
2. Notice of defects shall be given immediately in writing, but no later than seven days after arrival of the goods at the place of destination. In the case of drop shipments, the period commences upon arrival of the goods at the place of destination. The customer shall, in the case of drop shipments, ensure that it is able to satisfy its obligation to inspect and report defects upon arrival of the goods at the place of destination. Defects which cannot be identified within this period, even with meticulous examination, shall be reported immediately upon discovery, and all further work or processing shall cease at once. The warranty period remains unaffected.
3. If the customer accepts the goods in the manner agreed, notice of defects ascertainable using the agreed manner is precluded.
4. In the event of a claim for defects under warranty, we will replace or rework at our own discretion. After two unsuccessful attempts at subsequent performance, the customer may withdraw from the contract or reduce the purchase price.
5. If the customer does not immediately give us, for reasons attributable to it, the opportunity to convince ourselves of the defect (e.g. by returning samples/parts of the goods) despite being requested to do so, the warranty claims lapse in respect of the defect.
6. Responsibility for the application, use and processing of the goods purchased lies exclusively with the customer. Our technical advice, whether given verbally or in writing, is provided only as non-binding information - also in relation to any property rights of third parties - and does not relieve the customer of its own obligation to examine the products for their suitability for the processes and

purposes intended. Nevertheless, any liability on the part of the seller is limited to the value of the goods supplied by us.

VII. Exclusion of liability

1. Unless otherwise stated in this agreement, including the following provisions, we are liable for breach of contractual and non-contractual obligations under the relevant statutory provisions.
 2. We are liable for damages - for whatever legal reason - in the cases of intent and gross negligence. With other types of negligence, we are liable only for losses resulting from
 - a. injuries to life, limb or health,
 - b. breach of a material contractual obligation (obligation whose fulfilment is of eminent importance for the proper performance of the contract and on whose compliance the contracting party regularly relies and may rely); in this case, liability is, however, limited to the remedy of the foreseeable, typical loss.
 3. The limitations of liability from subsection 2 do not apply if we fraudulently conceal a defect or give a quality guarantee for the goods. The same applies to a customer's claims under the German Product Liability Act (Produkthaftungsgesetz).
 4. The customer may withdraw from, or terminate, the contract due to a breach of obligation which is not a defect only if we are responsible for the breach of obligation. A customer's free right of termination (especially under sections 651, 649 BGB) is precluded. Otherwise the statutory prerequisites and legal consequences apply.
 5. In particular with reference to Article 74 of the United Nations Convention on Contracts for the International Sale of Goods, CISG, any liability for damages on the part of our company requires that it be possible to accuse the management or employees of at least slight negligence to the extent no more serious fault is the case under these General Terms and Conditions, a contract or the law.
3. If the customer breaches the contract, for example, by failing to pay the purchase price due, the seller may, under the statutory provisions, withdraw from the contract and/or, based on its right to retain title to the goods, demand they be handed over. This demand does not simultaneously constitute a declaration of withdrawal; instead, the seller may simply demand the handover of the goods and reserve the right to withdraw from the contract. If the customer fails to pay the purchase price, the seller may assert these rights only if the customer had previously been set a reasonable deadline for payment or such deadline is dispensable under the statutory provisions.
 4. The customer may resell and/or process, combine or mix the reserved goods (entitlements). In this case, the following applies:
 - a. The retention of title to the goods extends to the products - at their full value - arising from the processing, mixing or combining of our goods, with the seller being deemed as the manufacturer. If, in the processing, mixing or combining with third-party goods, third-party ownership rights remain in existence, the seller acquires joint title in proportion to the accounting value of the processed, mixed or combined goods. Otherwise the same applies to the products arising as for the reserved goods supplied.
 - b. As security, the customer now, already, assigns to the seller in full or in the amount of any portion of joint title to the claims against the buyer's customer arising from the sale of the items, as per the foregoing subsection. The seller accepts this assignment of title. The customer's obligations stipulated in subsection 2 also apply in respect of the assigned claims.
 - c. The customer may resell, process, mix and combine, and collect the claim as long as it itself is neither overindebted under insolvency law nor insolvent, or threatening to become so. These entitlements and the right of collection definitely end if the customer fails to satisfy its payment obligations to the seller when due, the seller has therefore set the customer a deadline and the customer has not paid the claims owed within the period stipulated.
 - d. The customer shall disclose to the seller at its request the assigned claims and the debtor thereof (third-party debtor) before delivery to the third-party debtor. At the seller's request, it shall

VIII. Retention of title:

1. Until full settlement of all the seller's current and future claims arising from a contract of sale and an ongoing business relationship (secured claims), the seller reserves the right vis-à-vis the buyer to retain title to the items sold.
 2. The goods subject to retention of title (reserved goods) may be neither pledged nor assigned as security to third parties until full settlement of the secured claims. The customer shall immediately
- d. The customer shall disclose to the seller at its request the assigned claims and the debtor thereof (third-party debtor) before delivery to the third-party debtor. At the seller's request, it shall

provide all information necessary for collection, hand over the relevant documents and notify the debtors of the assigned claims.

- e. If the realizable value of the securities exceeds the seller's claims by more than 10%, the seller will, at the customer's request, release the securities at its own discretion.

IX. Place of jurisdiction, applicable law, arbitration clause

1. The place of jurisdiction is that of the registered office of the seller.
2. Exclusively German law shall apply. The only sales contracts which are based on this agreement follow the English version of United Nations Convention on Contracts for the International Sale of Goods, CISG dated 11 April 1980.

X. Final provisions

1. Should individual provisions of these Terms and Conditions be invalid or unenforceable, or become invalid or unenforceable after a contract has come into effect, the validity of the contract and the General Terms and Conditions of Sale remain unaffected. The invalid or unenforceable provision shall be replaced by a valid and enforceable provision whose effects come closest to the economic objective pursued by the contractual parties with the invalid and unenforceable provision. The foregoing provisions apply by analogy in the event of omissions.
2. Amendments and additions to the relevant contract shall be in writing.
