

Instru Plus

Product information

Product description

Instru Plus is an instrument disinfectant in concentrated liquid form, containing aldehyde.

Area of application

Suitable for all areas where medical instruments are processed by immersion methods. As a high-level disinfectant, it is part of the final manual reprocessing procedure of all thermostable and thermolabile instruments such as rigid and flexible endoscopes, endoscopic accessories and anesthesia equipment using immersion methods.

Product range and specification

Spectrum of activity

- bactericidal (including MRSA), yeasticidal
- tuberculocidal, mycobactericidal
- fungicidal
- active against enveloped viruses (including HBV, HIV, HCV, vaccinia-, influenza-, and corona viruses)
- limited spectrum of virucidal activity (incl. noro-, rota-, adeno-viruses)
- virucidal

Instructions for use

Instru Plus is supplied as a concentrate for the preparation of a working solution. The recommended concentration of the working solution is 3-5%. Insert instruments after cleaning. All surfaces and cavities must be covered or filled. The recommended concentration and contact times must be observed. Remove instruments, rinse thoroughly with water (drinking water quality), and dry. For semicritical medical devices that are not sterilized, germ-free, preferably sterile water should be used for the final rinse. Follow the hygiene requirements for the reprocessing of medical devices (in Germany: RKI, KRINKO, MPBetreibV). Follow the instructions of the instrument and equipment manufacturers. Instru Plus is not compatible with disinfectants containing amines. Thoroughly clean and rinse instruments, accessories, trays, reprocessing equipment and application aids after initial use and whenever products are changed. The product may lose color intensity towards the end of its shelf life. For professional use only.
