

Product description

OpSept virugon® is a ready-to-use, alcohol-based, re-fattening and perfume-free disinfectant for hygienic and surgical hand disinfection.

Areas of application

Applicable in all areas with increased risk. OpSept virugon® has a very broad spectrum of activity, particularly against enveloped and non-enveloped viruses. Effective hand disinfection is achieved in 30 seconds. OpSept virugon® is also suitable for individuals in the food sector, certified as HACCP-compliant according to EU Regulation (EC) No. 852/2004, and can be safely used within the framework of an HACCP concept.

Spectrum of activity

- bactericidal (incl. MRSA), yeasticidal
- tuberculocidal, mycobactericidal
- active against enveloped viruses (incl. HBV, HIV, HCV, vaccinia-, influenza- and corona-viruses)
- limited spectrum of virucidal activity (incl. noro-, rota-, adeno-viruses)
- virucidal

Instruction for use

Before disinfection clean heavily soiled hands with water and soap. Allow wet hands to dry before disinfection.

For hygienic hand disinfection apply 3 ml to the palm and rub both hands intensively for 30 seconds, ensuring complete coverage. It is important to ensure that spaces between fingers, nail edges, and skin folds are also thoroughly covered. Keep hands moist throughout the entire contact time of 30 seconds and, if necessary, reapply.

For surgical hand disinfection, apply enough to wet the entire palm of the hand for 2 minutes, including problem areas such as the interdigits and nail fold. Keep hands moist throughout the entire contact time of 2 minutes and, if necessary, reapply.

After the contact time of 30 seconds or 2 minutes has elapsed, the disinfection is complete.
