Instructions for use version: 3.0_EN
Date of issue: 06.03.2026

REF 480038-F

About these instructions for use

These instructions for use contain the necessary information for the correct use of Spray Off (referred to below as the "product"). The instructions for use must be kept in the immediate vicinity of the product and must be available to the user at all times. Anyone using the product must have read and understood the instructions for use in full, in particular the section on safety and the accompanying documents. Report all serious incidents (damage, injuries, infections, etc.) that occur in connection with the product to the manufacturer (see page 2) and the competent authority of the Member State in which the user and/or patient is established.

Accompanying documents

The following documents must be complied with in addition to the instructions for use: Labels on the product packaging, product data sheets, material safety data sheets, operating instructions, information on the shelf life of open containers. The documents can be downloaded from the Laboratorium Dr. Deppe GmbH website or requested by e-mail.

Explanation of symbols

These instructions for use and the labelling on the product use symbols to draw your attention to certain information and hazards.

Symbol	Description
	Manufacturer
	Use-by date
	Lot number
	Catalogue number, DrDeppe item number
	Consult instructions for use
	Medical device
	Unique Device Identifier
	The letters CE stand for European Conformity; this symbolises the compliance of the product with the applicable requirements that the European Community places on the manufacturer.
	Flammable
	Health hazard

Safety

The following section provides information on the safe use of the product. Read and follow all safety instructions and contact the manufacturer if anything is unclear.

Personal protective equipment*

Eye protection: Safety goggles are recommended when decanting. Not required for normal handling.

Skin and body protection: Wear suitable protective clothing when working.

Hand protection: Wear suitable chemical-resistant gloves. Nitrile rubber (NBR). EN ISO 374.

Respiratory protection: Not required for normal handling. Wear suitable respiratory protective equipment if ventilation is inadequate. Short-term exposure. Breathing apparatus with gas filter. A-P2.

**Section 8.2. Exposure controls / Safety data sheet*

Safety information

The following safety instructions apply when handling the product

Do not use the product on humans. Do not use the product for the disinfection of semi-critical and critical medical devices. Check that the packaging is intact before use. Do not use the product if the packaging is damaged. Do not use the product after the expiry date. Wear the necessary personal protective equipment. Be aware of the risk of explosion and fire when using alcohol-based disinfectants on large surfaces. The formation of flammable vapour-air mixtures is possible during use. Ensure good ventilation during and after use. Do not eat, drink or smoke when using the device. Protect the product from direct sunlight and keep it away from sources of ignition, food, drink and animal feed. Restrict spray disinfection to areas that cannot be reached by wipe disinfection. Avoid contact with the skin and the eyes. Wash your hands carefully after use and use a skin care cream. Remove clothing that has come into contact with the product immediately after use and wash it before wearing it again. Do not use the product in combination with oxidising agents. Avoid releasing it into the environment. Take precautionary measures against static discharge. Repeated contact with the product can lead to chapped or cracked skin. The product causes severe eye irritation on contact. Keep out of reach of children.

Safety measures

Take the following measures in the event of improper use or accidents with the product.

First-aid measures

General: If you are unsure of anything or if symptoms persist, consult a doctor.

After inhalation: Move the person to fresh air and ensure unobstructed breathing.

After skin contact: Rinse skin with water/shower. Remove/take off immediately all contaminated clothing. Acute and delayed symptoms: Repeated exposure may cause skin dryness or cracking.

After eye contact: Rinse cautiously with water for several minutes. Remove any contact lenses if possible. Continue rinsing. If eye irritation persists: Get medical advice/attention. Acute and delayed symptoms: Eye irritation.

After ingestion: Call a poison centre or doctor if you feel unwell.

Firefighting measures

Comply with the following instructions and measures in the event of fire.

Suitable extinguishing media: Use suitable extinguishing agents for surrounding fires. Water spray jet, dry extinguishing powder, foam, carbon dioxide.

Unsuitable extinguishing media: Do not use a full jet of water to prevent the fire from scattering and spreading.

Special hazards arising from the substance or mixture

In the event of fire, toxic fumes, carbon dioxide, carbon monoxide and nitrogen oxides may be released as hazardous decomposition products.

Advice for firefighters

Protection during firefighting: Do not attempt to work without suitable protective equipment. Use a self-contained breathing apparatus and full protective clothing.

Disposal of extinguishing media: Do not allow the extinguishing water to enter the sewage system or watercourses. The disposal of extinguishing water must be carried out in accordance with official regulations.

Accidental release measures

Comply with the following instructions and measures in the event of accidental release of the product.

Personal safety precautions

For non-emergency personnel: Ventilate the contaminated area. No open flames, no sparks and no smoking.

For emergency responders: Do not attempt to work without suitable protective equipment.

Environmental precautions

If the product enters the sewage system or public waters, the authorities must be notified. Avoid penetration into the subsoil. Prevent the product from entering the sewage system and public waters.

Methods and material for containment and cleaning up

For containment: Collect spillage.

Cleaning procedure: Soak up the spilled liquid using mechanical methods (wiping up, sweeping up) with absorbent material. Take substances or residual quantities in solid form to an authorised facility.

Disposal: Disposal must be carried out in accordance with official regulations.

Intended purpose

The product is an alcohol-based surface disinfectant for disinfection in particular of surfaces of non-invasive medical products and surfaces in medical environments. Surfaces of instruments or semi-critical and critical medical devices are excluded.

Requirements for the user

The product is intended exclusively for use by trained medical personnel and cleaning specialists from the healthcare sector.

Requirements for the usage environment

The product is intended for use within the following temperature ranges.

Outside the temperature limits there are no data on efficacy. Recommended ambient temperature for use (min. - max.): 20 - 25°C

Material compatibility

The product shows good material compatibility with negligible changes on surfaces made of various plastics, metals, glass and rubber. Application is not recommended for alcohol-resistant surfaces such as acrylic glass and polycarbonate and also aluminium. Exceptionally long contact times (> 1 day) resulted in discolouration and loss of flexibility in latex and rubber. We recommend testing material compatibility for any specific application on an inconspicuous area before the first application.

Product properties

The product is used as a disinfectant to eliminate microorganisms on medical instruments and ultimately helps to prevent infections.

Composition/Active substance

The following information refers to 100 g of the product:

Ethanol: 63.50 g

Didecyltrimethylammonium chloride: 0.05 g

Chemical and physical properties

Colour: colourless-clear

State: fluid

pH-value: 10.7 - 11.7

Density: 0.8829 - 0.8929 g/ml

Contact Times

The efficacy of the product depends on the exposure time of the product on surface to be treated. The amount that needs to be applied to the surface depends on the application conditions. Keep the surface moistened with working solution for the entire exposure time for a safe effect.

Efficacy: Bactericidal (EN 13727; EN 16615*)/yeastcidal (EN 13624; EN 16615*) with mechanical action, dirty condition 1 min.; Tuberculocidal/Mycobactericidal (M. terrae, M. avium/ EN 14348) dirty condition 5 min.; Fungicidal (C. albicans, A. brasiliensis/EN 13624; EN 13697) dirty condition 5 min.; Active against enveloped viruses according to DVV/RKI (Vaccinia strain Elstree, BVDV strain NADL) 10% FBS 1 min.; Active against enveloped viruses according to EN 14476 (Modified Vaccinia Ankara/ EN 14476) clean condition 1 min.; Limited spectrum of virucidal activity (Adenovirus type 5, Murine Norovirus/EN 14476) 10% FBS 1 min.; Virucidal effective against Polyoma SV-40 according to DVV/RKI, 10% FBS 5 min.; Virucidal (Murine Norovirus, Adenovirus type 5, Poliovirus type 1/EN 14476; EN 16777) clean condition 5 min.

** tested on reference wipe*

Use

Using the product

The ready-to-use solution is preferably to be applied using the wiping method with a disposable cloth. Spray disinfection should preferably be limited to areas that are not reachable by wiping disinfection. When using the spray method, it should be combined with wiping method. Test material compatibility on an inconspicuous area, taking into account the planned application time. Apply the working solution to the entire surface to be disinfected. Spread the working solution with a clean disposable cloth until the surface is completely wetted. It is important to keep the surface to be disinfected moist throughout the entire contact time to achieve effectiveness. Dispose of the disposable cloth properly.

Storage and disposal

Requirements for the storage environment

Store the product in a well-ventilated place in a sealed condition and protect it from unauthorised access.

Shelf life

Do not use the product after the expiry date indicated on the packaging and dispose of it properly. The product has a shelf life of 12 months after opening.

Disposal

Disposal must be carried out in accordance with the applicable national and local regulations. The instructions in the safety data sheet for the concentrate must also be complied with.
