Disinfectant wipes

Spray On wipes

Product information

Product description

Spray On wipes are ready-to-use alcohol-based surface disinfectant wipes that are free from aldehydes and QAVs. The wipe material is made from cellulose fibres, which are produced from wood, a renewable raw material.

Area of application

Health care facilities and pharmaceutical and cosmetic industry, for example patient-near environments, working areas/desks, general equipment (excluding food contact surfaces): disinfection of small hard/non-porous surfaces.

Spectrum of activity

- bactericidal (incl. MRSA), yeasticidal
- active against enveloped viruses (incl. HBV, HIV, HCV, vaccinia-, influenza- and corona-viruses)

Instructions for use

The surface to be disinfected is wiped and moistened with a sufficient amount of the product to ensure complete wetting. It is important to note that the surface to be disinfected must be kept moist throughout the entire exposure time in order to achieve effectiveness.

The biocidal product Spray On wipes (active ingredients: Propan-1-ol and Propan-2-ol) has received Union and Swiss authorizations for product type 2 disinfectants and algaecides not intended for direct application to humans or animals) and product-type 4 (food and feed area) with authorization numbers EU-0027668-0000.
The authorization is valid until July 31, 2032.
